

Acknowledgment

This special issue would have not been possible without the support we received from different organizations and individuals in the process.

First, we would like to thank the Federal Ministry of Health of Ethiopia, Afar Regional Health Bureau, Afar District Health officials, and the technical assistance team at Pathfinder International Ethiopia. Their full support and follow-up throughout the research process were invaluable.

Research team and authors who contributed to this special issue are from Mekelle and Samara Universities. The administrative support we received from both universities were instrumental to the smooth undertaking of the research and production of this special issue. We thank both universities not only for their support but also for giving us the time and freedom. Furthermore, the extensive administrative support from colleagues working at Mekelle University and the Federal Ministry of Health is particularly superb. We would like to thank Dr. Loko Abaham, Dr. Belete Assefa, Mr Muez Gebru, Mrs. Lemlem Kidane, Mrs. Frehiwot Techane, Mrs. Miheret Dana, Mr. Atsbeha Berhe, Mr Alebachew Tamene and Mr. Wendimagegn Tekalign. Without the support of these colleagues in facilitating the financial, human resource and logistic requirement of our research work, this special issue would not have been made possible.

Since the start of the research, we received support of different kinds from different individuals. Our special thanks go to Dr Ephrem Tekle Lemango and Dr Abiy Hiruye Sinke of the Federal Ministry of Health, and Mr Yasin Habib of Afar Regional Health Bureau. Their suggestions and inputs during the design and conduct of the research process was very important. Their inputs helped us to align our research questions to the needs of both the Ministry and Regional Health Bureaus and also organized forums that helped us to disseminate the findings. We would like to extend our appreciation for their guidance and support. We would like to thank Mr. Mohammed Ahmed, then deputy Regional Health Bureau of Afar for his guidance and

wholehearted support to the research project in his region.

We would also like to thank Dr Getnet Alemu and Mr Abebe Alebachew of Breakthrough consultancy firm, and Lucy Palmer and James Fairfax of Mott MacDonald consultancy firm, for their independent inputs to improve the quality of the research process and subsequent outputs. Mott MacDonald contracted two independent experts affiliated to the London School of Hygiene and Tropical Medicine, (Dr Cicely Marston and Dr Yemisrach Okwaraji) to review the documents. We would like to thank them for their professional insights and useful comments to all the manuscripts in this special issue.

We thank Dr. Mirgissa Kaba, Editor-in-Chief of the *Ethiopian Journal of Health and Development*, and the peer reviewers for taking their precious time to critically review our manuscripts and the back and forth in the process that was educative in the process. Their scholarly reviews and language edits were useful in enriching and refining the contents and arguments of the manuscripts.

Finally, we would like to express our utmost thanks to all study participants, supervisors, data collectors and drivers who participated in this research work.

Funding

This research work was funded by the Department for International Development (DFID) of the United Kingdom through the Reproductive Innovation Fund (RIF) that was managed and implemented by the Federal Ministry of Health of Ethiopia. These funding agents had no role in designing the study, data collection, analysis, data interpretation, or the writing, of the manuscript.

Competing interests

The authors who participated in this special issue declare that they have no competing interests.
